SHAUN SULLIVAN

Full Stack Web Developer

EDUCATION

Carleton University
Full Stack Web Development Bootcamp
February 2022-July 2022

Program consisted of three group projects, all of which involving Full Stack languages and concepts. All projects included use of Git, GitHub and CLI.

Project 1: We used an open source API for a vegetable database. I used HTML, CSS, Javascript, and API's to create a informative vegetable search database, also including an API linking weather forecast to your specific location.

Project 2: We created an online site where Users can search up book clubs in coffee shops in specific cities. We used REST API's for logins and comment sections, SQL to create the database, Node and Express.js to launch server. Insomnia was used to test each end point.

Project 3: We created a full stack website using the MERN stack. Online shopping experience with ability to search for items, filter search for items, add and remove items to cart, checkout and pay using credit card.

WORK EXPERIENCE

Home Instead
Owner
January 2016 - November 2022

Started as General Manager in 2016 and made the move to Managing Partner in 2020. Was the second franchise in Canada to bring benefits to our frontline workers. Revenue Increase of 70% in first 18 months as Partner. Finished 2020 as the 3rd highest growth among 41 Canadian franchises.

Worked roles in employee recruitment, training, and ongoing training. Payroll, invoicing, management of all CRA tax payments. Networking role throughout Ottawa, working with local charities and support groups.
